

THE POWER OF 3

Brokk, Kraft, Studsvik: Leaders in Remote Intervention Technologies

In the spirit of innovation, Brokk, KraftTeleRobotics, and Studsvik have teamed together in the application of remote systems technology to improve customer productivity. By combining the power and mobility of a Brokk machine with the dexterity and intuitive control of a Kraft manipulator arm, Studsvik field service technicians will be able to do the work of human hands, but from a safe remote location. The close collaboration between Brokk, Kraft, and Studsvik offers new solutions that enhance existing products, improve safety, and support the development of new products and processes.
